Calsonic Kansei's Senior Vice President called on Mayor of Saitama City

Calsonic Kansei Corporation announces its Senior Vice President, Noboru Noda, called on Mayor Hayato Shimizu of Saitama City today, to report on the results and contributions to the region by Calsonic Kansei through its various activities.

Ever since Calsonic Kansei established its R&D Center in Saitama-city in 2008, together with the shifting of its headquarters from Tokyo's Nakano-ku, Saitama has been Calsonic Kansei's nucleus for its global expansion reaching out to 78 sites around the world. Calsonic Kansei achieved consolidated sales of 669.4 billion yen in FY2008, the first year of its shift. This increased to 965.6 billion yen in FY2014, and is expected to exceed one trillion yen for the first time in FY2015.

Together with its global expansion, Calsonic Kansei works to be a corporation recognized and trusted by the local community in Saitama City, carrying out various activities such as the implementation of workplace charging and opening the use of electric vehicle (EV) charging stations to the public; clean-up activities of the surroundings; securing water sources through provision of drinking water during times of disaster; organizing of Environmental Communication discussions involving the local communities.

Calsonic Kansei will continue to carry out such initiatives, as it works towards cooperation and co-existence with the local community.

Note: Workplace charging

Charging stations are installed at a company's office buildings and plants so that employees and visitors can charge electric vehicles (EV) while working or carrying out business. This initiative aims to make the usage of EV even more pleasant and convenient, and at the same time conserve the surrounding environment through reducing emission gases.
