

**“MARELLI”, the new brand representing Calsonic Kansei and Magneti Marelli, to exhibit at Automotive Engineering Exposition 2019 Yokohama**

-- Two merged businesses will exhibit cutting-edge technology and products under the banner of the new brand --

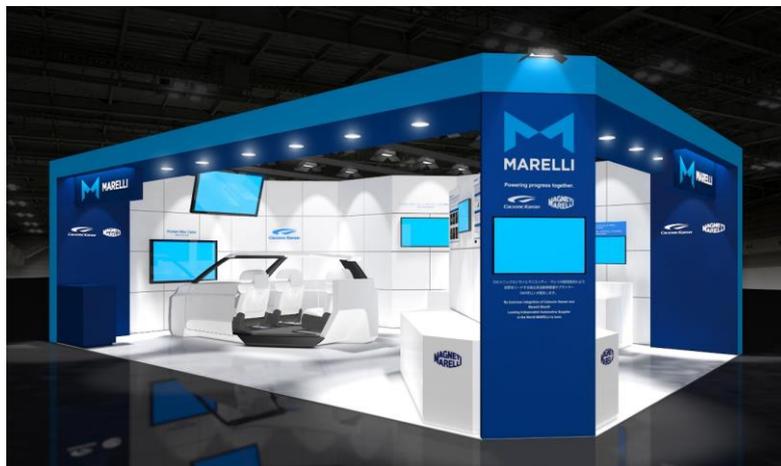

**[SAITAMA, Japan - May 15, 2019 -]** Calsonic Kansei Corporation, a leading Japanese automotive supplier, will be exhibiting with Magneti Marelli under the new brand “MARELLI” at Automotive Engineering Exposition 2019 Yokohama held between May 22 and May 24, 2019 at Pacifico Yokohama.

We work to enrich the “mobility life” of people as a true partner to all of its customers. At the booth for this exposition, visitors can see our solutions that bring together cabin innovation and energy management, which are offered in the spirit of true partnership.

In the field of cabin innovation, we will be exhibiting our solutions provided as a comprehensive integrator of cabin systems, such as the Human-Max Cabin concept model, which maximizes the experience of every individual movement.

Meanwhile, in the field of energy management, we will be showing visitors the concept of our approach and some specific solutions through video displays and exhibits of our products.

We look forward to welcoming you to the exhibits by “MARELLI”, which will show off the cutting-edge technologies and products that we can deliver as an independent Tier 1 supplier with a global network.

## **Introducing our Exhibit at Automotive Engineering Exposition 2019 Yokohama**

### **■ Cabin Innovation**

The Human-Max Cabin that we imagine for the future is designed to maximize the human element and offers an experience that defies all expectations. With a full complement of personalization functions, you can create a “cabin of my own” - an unbeatably comfortable space tailored to you. This experience is made possible by bringing together the interior fittings, electronics, and air conditioning that we provide.

### **■ Energy Management**

We are striving toward integrated energy management by taking advantage of its power electronics technologies, which are based on our history of world-leading inverter production, and our wide range of technologies and products covering air conditioning, heat exchangers, exhaust, and other heat-related areas, all of which are underpinned by our many years of experience in heat exchange technology. At this exhibit, we will present our concept of energy management and four specific

solutions through video displays and exhibits of our latest products.

### **■ Event Summary: Automotive Engineering Exposition 2019 Yokohama**
