Magneti Marelli Parts & Services

brake discs are high-tech products that meet the quality standards of OE products, with environmentally friendly coating lines:

Their constituent materials are coated with a durable grey paint that makes them corrosion-resistant.

They ensure comfortable, safe, vibration-free and precise braking.

Each disc is ECE R90 certified.

BRAKE PADS

MAGNETI MARELLI PARTS & SERVICES

Magneti Marelli Parts & Services brake pads are made with high quality friction materials and meet OE quality standards:

Friction materials are made of different and multi-layered composite compounds, which provide insulation, noise dampening capacity and improved comfort.

High Performance for the entire duration of the pad

- Reduced running-in time
- ECE R90 approval.
- High friction coefficient at any temperature or speed.
- Operating temperatures from -30°C to $+500^{\circ}\text{C}$.
- Reduced disc wear.
